# Universal Socket Connectivity Selector Guide

**MultiTe** 

Multi-Tech's Universal Socket flexible comm-port architecture provides cellular, Ethernet, PSTN or Bluetooth® socket connectivity with interchangeable communications devices. This means you can utilize one system design and populate it with the appropriate connectivity option. Now you can provide a full-line of connectivity by simply dropping in the communications device of choice. In addition, you are assured a seamless migration to future technologies - simply upgrade your connectivity module and keep your product current and design intact.

Multi-Tech's intelligent Universal IP® consists of a common set of TCP/IP networking protocols and machine-to-machine (M2M) applications implemented using a standard AT command interface. Universal IP allows developers to write their host application one time while having the freedom to select from a growing number of Universal Socket communication devices and use the latest 2G and 3G technologies.

The Universal Socket Developer's Kit allows you to plug in the communications device and use it for testing, programming and evaluation. Contact your local Multi-Tech distributor or sales representative for complete details or visit our website at www.multitech.com/pdfs/devkit.go

Our Universal Socket Developer's Guide assists you in evaluating the embedded family of connectivity solutions as you consider the different options for current, as well as, future requirements of your product strategy. To obtain a guide, contact Multi-Tech directly or visit our website at www.multitech.com/primers/universal\_socket.go

#### SocketModem<sup>®</sup> iCell

- Intelligent cellular modems
- · 2G and 3G, GSM and CDMA
- · Serial only or Serial and USB
- · GPS
- Universal IP
- · GPIO

Global\*

### SocketModem<sup>®</sup> Cell

#### Cellular modems

- · 2G and 3G, GSM and CDMA
- Serial or USB interface
- · Embedded TCP/IP stack

# SocketModem<sup>®</sup> & SocketModem<sup>®</sup> IP

- · V.34/33.6K fax · Serial or parallel interface
- · 3.3 or 5V models
- Universal IP available

· V.92/56K data rates

#### SocketEthernet IP®

#### Serial-to-Ethernet device server

- 10/100BaseT Ethernet interface
- Medical/high voltage isolation (EN60601)
- · Multiple LED driver outputs

#### SocketWireless® Bluetooth®

#### Serial-to-Bluetooth device server

- 100 meter (330 ft.) range
- · Class 1 Bluetooth V2.0 compliant
- · Point-to-point and multi-point communications

\* Multi-Tech's global modems are designed for worldwide applications with approvals in many countries. This means one SKU can ship virtually anywhere.

# **Embedded Analog Modems**

Complete, ready-to-integrate voice/data/fax modems.
