synaptics®

Astra System on Module

Introducing the AMPAK System on Module, featuring the Synaptics Astra™ SL1620 with Synaptics combo connectivity, which delivers exceptional capability and flexibility for applications such as medical data acquisition terminals, home control and automation, and home appliances

Key Features:

- Compact design packed with cutting-edge technology.
- Seamless connectivity and powerful processing.
- Modular approach for easy customization and expansion.
- Supports SyNAP® AI framework for edge inferencing

Experience the future of device innovation with the Astra™ SoM – where performance meets versatility
